

STRIKER POWER PRO BATTERY

STRIKER POWER PRO BATTERY

Want a battery that delivers more run time?

Our high capacity battery delivers up to 15% more run time vs. a standard amp hour battery. Ideal for tough warehouse applications, the Pro Series handles higher lifting, longer runs, and heavier loads.

Tubular Cell Technology

Extremely efficient plate technology designed for higher amp hour and lower operating temperature.

High Capacity

Tubular technology allows for the addition of additional plates within the same compartment. This increases the amp hour by up to 15%.

Minimal Water Consumption

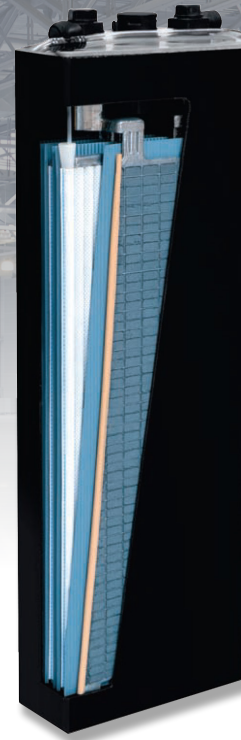

The micro-porous separator allows you to focus more on your operation and less on watering.

Superior Durability

The positive armored tube plate reduces vibrations and keeps your battery running efficiently.

Less Maintenance

The Pro Series is easier to maintain with larger water reservoirs, has shorter cool down times and better thermal resistance.

Striker

POWER SYSTEMS

Striker power has the expertise to help your material handling business become more efficient. Contact us to maximize your uptime.

Application	Striker Power Solutions
Watering Cycles	Weekly
Capacity	100-1,550 AH
Inter-Cell Connections	Welded Connector
Life Cycles	1,500+
Single Point Watering System	Optional
Striker Air System	Optional
Electrolyte Level Sensor	Optional
BMOD	Optional
Charging Solutions	1 Phase, 3 Phase, High Frequency Multi Voltage Opportunity
